## WON'T SEE CHICAGO.

**President Cleveland's Delay in Taking Action the Cause of Li Hung Chang, the Great Chinese Statesman, Curtailing His Visit to this Country—Will Only See Some of the Eastern Cities.**

William E. Curtis in Chicago Record: The people of Chicago will not have the pleasure of entertaining Li Hung Chang, for the reason that the Canadian authorities were more zealous and courteous than those of the United States. Toronto, and Ottawa and to go through the dominion of Vancouver, while he was patiently waiting for some formal invitation or some sign of welcome from the United States. It has been settled that he will be the guest of the nation, and Mr. Cleveland is coming to New York to receive the letter which he bears to the Emperor of China, the son of heaven, the President of the United States. Earl Li has no official mission to this country. He simply bears a letter of compliment and friendship and costly gifts, which are duplicates, or, at least, similar to those he has already presented to Queen Victoria, Emperor William, King Leopold of Belgium and the president of France. His mission, however, is to make friends and acquire knowledge which may be useful to him in his government, and that he has not been furnished a larger opportunity to do so in the United States is due to the negligence and indifference of the President and secretary of state. Mr. Cleveland does not like to entertain strangers. That fact was discovered by the Princess Eulalia and the duke of Veragua, and it required a great deal of pressure to persuade him to receive Li Hung Chang.

Wherever the great Chinese viceroy has been in Europe he has been welcomed and entertained as the guest of the nation, and he expected to receive a similar invitation from the government of the United States. Several months ago the Chinese minister at Washington proposed to that effect by writing an official note to the secretary of state that Li Hung Chang was intending to visit this country, and that he bore an autograph letter from the emperor to the President. Then was the time for Mr. Cleveland to have had him welcome, but he did not. There was only a formal acknowledgment of the receipt of the announcement, and the minister did not know whether the President was willing to receive such a letter or not. There was no further communication in the meantime, until a few weeks ago the Chinese minister advised Secretary Olney that Earl Li would sail from Southampton August 23, and arrive in Washington about the 25th, and asked when he would be able to see him. The minister presented his letter to the President. That brought matters to a crisis. Something had to be done, but the President did not like to be disturbed in his fishing by the visit of Chinese mandarin, and the officials of the department of state have been in a stew trying to figure out some way in which they could receive the troublesome Chinaman and get rid of him without annoying the President.

When certain people who appreciated the importance of Li's visit learned of the situation they were astonished that President Cleveland should be so disinclined to the representative of a fellow ruler, and at once began to bring influence to bear upon him and upon Secretary Olney to secure for the viceroy a proper reception to the United States. It is gratifying to know that although late and reluctant such a reception has been decided upon, and Li Hung Chang will be the guest of the United States from the time of his arrival on the 25th of August until the 6th of September, when he will be turned over to the Canadian authorities, who have been beseeching him with invitations six weeks before he received an intimation that he would be welcome in the United States.

It is believed by his friends here that Earl Li would have been glad to have remained longer than one brief week in this country, but he became discouraged when he heard nothing from Washington, and engaged his passage upon the Empress steamer, which sails from Vancouver on the 11th of September. There is no foundation for the story that he feared assassination by the Chinese highlanders, and the yarn that he anticipated insult on the Pacific coast as a result of his stay in the United States simply because he received no intimation whatever from our government that his presence would be welcome. That is the naked truth.

General Ruger has not yet had time to make out the official programme, but he has a general idea of what will be done. It is proposed to meet the American steamer St. Paul, on which the viceroy came, at Sandy Hook with a fleet of naval vessels, the largest that has been assembled since the Columbian review, and convey him to quarantine, when, after the proper salute he will be taken off by the dispatch boat Dolphin and landed at the Pier-4th street wharf. The state apartment at the Waldorf hotel will be reserved for accommodation. On the following day the President will come up from Gray Gables to receive him. It has not been determined when the ceremonies will take place, but they will probably be at the Waldorf hotel. It is expected that some entertainment will be offered by the city authorities, but he will remain here only two or three days. He has promised to visit Philadelphia, and has accepted invitations to dine with John Russell Young at the Union League club in that city and inspect the Cramp ship yards.

From Philadelphia he goes to Washington, where he will be entertained by the Chinese minister. From there he goes direct by special train to Niagara Falls, on Sunday, September 8, where he will be met by the Canadian authorities, who will escort him to Toronto, Ottawa and Montreal and then send him to Vancouver by a special train over the Canadian Pacific. He will be asked to go from Montreal to Vancouver via Detroit, Chicago, St. Paul and Winnipeg, but it is not believed that the Canadians will consent to such a diversion. The high commissioner of Canada in London and the management of the Canadian Pacific railway declined him their hospitality six weeks ago and he accepted their invitations before he heard from our government. Thus, because of his indifference, he will see very little of the United States.

**New Cattle Disease.** ST. LOUIS, Aug. 19.—A special from Ottawa, Ill., says: Farmers in Brookfield township, just south of Marseilles, are greatly exercised over a new disease which has broken out there. The disease has spread in three herds of over 100 head, and many of the animals are hopelessly blind, and others rapidly losing their sight. Dr. Dennis, an Ottawa veterinarian, who was called to see them, can find nothing in the authorities relating to the disease which in each case effects the pupil of the eye. It may be necessary to kill all the affected cattle killed to prevent the spread of the peculiar malady.

**Cure for Headaches.** As a remedy for all forms of headache Electric Bitters has proved to be the very best. It effects a permanent cure and the most dreaded habitual sick headaches yield to its influence. We urge all who are afflicted with such a trouble, and who have tried a fair trial of the habit of habitual constipation Electric Bitters cures by giving the needed tone to the bowels, and few cases long resist the use of this medicine. Try it once. Large bottles only fifty cents at Logan Co's Drug Store.

**What is Easy?** You can telephone to Pittsburgh, New York, Washington, Boston, Chicago, St. Louis, Louisville, or Memphis just as easy as you can to Slatersville, W. Va.

**Dr. Miller's Pain Pills** stop Headaches.

## WHAT IS THIS DISEASE CALLED DYSPEPSIA?

Like a thief at night it steals in upon unwares. The patients have pains about the chest and sides, and sometimes in the back. They feel dull and heavy; the mouth has a bad taste, especially in the morning. A sort of sticky slime collects about the throat. The appetite is poor. There is feeling like a heavy load on the stomach; sometimes a faint, all-gone sensation at the pit of the stomach which food does not satisfy. Eyes are sunken, the hands and feet become cold and clammy. After awhile a cough sets in, at first dry, but after a few days it is attended with a greenish yellow colored sputum. The patient feels tired all the while, and sleep does not seem to afford any rest. After a time he becomes nervous, irritable and gloomy, and has evil forebodings. There is a giddiness, a sort of whirling sensation in the head when rising up suddenly. The bowels become constipated; the skin becomes hot and at times; the blood becomes thick and stagnant, the whites of the eyes become tinged with yellow, the urine is scanty and high colored, depositing a sediment after standing. There is frequently a spitting up of the food, sometimes with a sour taste and sometimes with a sweetish taste; this is frequently attended with palpitation of the heart; the patient becomes impaired with spots before the eyes and a feeling of great prostration and weakness. All of these symptoms are in turn present. It is thought that nearly one-third of our population has this disease in some of its varied forms. It has been found that medical men have mistaken the nature of this disease. Some have treated it for a liver complaint, some for Dyspepsia, others for Kidney disease, etc., but none of the various kinds of treatment have been attended with success.

Now, the Shaker Digestive Cordial causes the food eaten to be digested. This will cause an appetite for more food, and this being digested will result in an increase of strength, an increase of blood, and an increase of power. The tired, weary feeling will give way to vigor and courage. The pale, thin and emaciated will recover their color and plumpness, because red blood and fat are the result of properly digested food.

A ten cent trial bottle will produce a result. Its good effect will be realized at once. You do not have to take a dozen bottles to find out if it is doing you any good. Try it, and then give praise to the Shakers of Mount Lebanon, New York, for the relief that you obtain.

## FINANCE AND TRADE.

## The Features of the Money and Stock Markets.

NEW YORK, Aug. 19.—Money on call steady at 2 1/2 per cent. Prime mercantile paper 7 1/2 per cent. Sterling exchange weak, with actual business in bankers' bills at \$4 5/16 1/2 for demand and \$4 1/4 1/2 for 60 days. Postpaid rates \$4 5/8 1/2 and \$4 5/8 1/2 1/8. Commercial bills \$4 5/8 1/2. Silver certificates 65 1/2. Bar silver 65 1/2.

The stock market to-day was more active, but the opening was not so professional than heretofore. The movement of prices was downward in the forenoon, but in the afternoon dealings were characterized by decided strength, owing to a further slump in exchange rates leading up to an announcement of preparations actually making for the importation of gold from Europe. The market closed in a decided advance, owing to the receipt of lower London quotations, the stringency in money and commercial paper, moderate foreign selling here, and reports of further cutting of railroad rates. The averages in the prices of the leading shares were extensive. About noon the market began to rally, chiefly on cotton, and in the afternoon the weakness in the exchange and rumors of gold import probabilities and the early declines were soon recovered. London was a buyer to a moderate extent. The gains over the early low points were material in many instances. The closing was strong but a shade below the best price at general fractional net improvements.

The railway bond market displayed a lower tendency early, but later stiffened sharply on increased dealings.

Governments were steady on dealings of \$12,500.

Silver certificates were firmer at 65 1/2 for 5000.

Evening Post's London financial cablegram. The only feature in the stock exchange here to-day was the sharp rise in Kafirs on Cape buying, which has imparted animation both in London and Paris markets and giving a contradiction to the pessimistic tone of the Times' correspondent. The other markets were listless. Americans were inclined at one time to harden on the cable reports of the success of the night's gold meeting in New York, but the selling in that city broke the market, which closed flat.

The fall in American exchange excites the fullest interest here. The connection between cause and effect in the matter is very imperfectly understood, but it has hardened the money market here a little on the theory of the possibility of a gold export from New York. The Paris and Berlin markets were firm.
